Brushing techniques

Answers

Ex.1

1

2

3

4

1. bristles of a toothbrush (włosie szczoteczki)
2. clenched teeth (zaciśnięte zęby)
3. gums (dziąsła)
4. decay, cavity (próchnica)

Ex.2

Effects (skutki):

decay (próchnica)

cavities (ubytki)

periodontitis (zapalenie przyzębia)

gingivitis (zapalenie dziąseł)

halitosis (halitoza)

root canal treatment (leczenie kanałowe)

Ex.3

Horizontal technique

Ex.4

1. T

2. F - Horizontal technique is not recommended (*technika horyzontalna nie jest polecana*)

3. F - Fones method is done by moving the brush in circular motion along clenched teeth (*metoda Fonesa jest wykonywana poprzez wykonywanie okrężnych ruchów szczoteczką na zaciśniętych zębach*)

4. T

5. T

6. F - The bristles are directed towards the edge of the teeth (*włosie jest skierowane w kierunku brzegu zębów*)

Ex.5

to chew - to crush food between your teeth before you swallow it (*żuć*)

back and forth - in one direction, then the opposite way, then in the original direction again many times (*w tą i z powrotem*)

gingival recession - the exposure in the roots of the teeth caused by a loss of gum tissue (*recesja dziąseł*)

fixed prosthetic appliances - replacement of missing teeth permanently cemented in place (*stałe uzupełnienia protetyczne*)

dexterity - skill at doing something especially using your hands (*zręczność*)

to insert - to put something into something else (*umieścić*)

scrubbing motion - rubbing with a brush (*ruchy szorujące*)

essential - very important and necessary (*konieczne*)

Ex.6

1. chew
2. essential
3. dexterity
4. gingival recession
5. fixed prosthetic appliances
6. back and forth
7. insert
8. scrubbing motion

Ex.7

1. I do not recommend this technique, because it leads to the gingival recession.
2. Move the brush in circular motion along clenched teeth.
3. Place the bristles of a toothbrush towards the gums at 45 degree angle.

Ex.8

: -)
